

## 4-PAD VACUUM LIFTER AT A GLANCE

- Lifting Capacity - 2,200lbs
- 4 suction pads - 21" x 13"
- Pneumatic Tilting 0-90°
- Continuous vacuum pump powered by compressed air
- Gauge with graduated and colored scale to monitor degree of vacuum
- Powerful and quiet vacuum generator with reduced air consumption using 3/8 inch air lines
- Gaskets made of rubberized fabric suitable for smooth, flamed, and bush-hammered surfaces
- Each pad controlled individually to optimize lifting odd shaped parts
- Sliding valve to control gripping and releasing of the material with safety block against involuntary maneuvers
- Aluminum safety tank for vacuum reserve and condensation discharge valve, to guarantee gripping even when there is loss of power and wet surfaces
- Audio and visual alarm system which automatically signals a low vacuum degree
- Alarm system works autonomously by means of rechargeable batteries and it is supplied with the appropriate battery charger at 100 volt
- Maneuvering handle with pushbutton control unit holder
- Parts supplied from BACA Systems
